

Modelling.

- We have saved default grid properties (standard.grd) with magnetic option turned off.

- The default model template for our local environment (1stStepsWithTeklaStructures-australasia) has been updated to TS15.

- We have added surface treatment patterns for Checker Plate, Diamond Mesh and Grating. The TilePatternCatalog.xml & TilePatternCatalog.dtd were taken directly from the UK environment but we created pre-saved surfacing files for each of these patterns named Checker_Plate, Diamond_Mesh and Grating.
